

COLLOIDAL SILVER

At our recent meeting (October 9, 2021), George Banks made a presentation of the value of colloidal silver and what it might be used for. He demonstrated how to make it at home for pennies. Research will reveal that colloidal silver was used in the field during WWII to replace lost blood, and to treat burn patients. It proved to be soothing, and to prevent any infection!

The video, including that presentation, is available on YouTube and Rumble.

This is information from "Honey Colony" that lists some of the ways this could be helpful to us all.

Silver is an ancient and natural all-purpose immune supporter. It wipes out bacterial infections in a safe and clean manner, without compromising your immune system like antibiotics do.

Silver effectively vanished from the medicinal market in the early 20th century. It vanished because it couldn't be patented or fetch extraordinary profits for the pharmaceutical industry. In modern lab tests, silver is getting its fame back as a safe, multi-purpose bacterial killer. Silver is known to kill superbugs (e.g. MRSA) and has been tested against 650 common and exotic infections and diseases.

If you ever had to take antibiotics for any of the 51 conditions below, then it's time to consider silver. Silver comes in different forms too. Whether it's in colloidal form (made by Silver Healer) or chelated, protein-binding form for added bioavailability (made by Silver Excelsior), silver may be the all-natural solution against bugs and bacteria that are wreaking havoc on your health.

The fact is: repeated antibiotic use strengthens the bacterial strains, and radically weakens the immune system.

MAKE SOME COLLOIDAL SILVER AND KEEP IT HANDY. DRINK A GLASS OR TWO IN THE FIRST SIGN OF SNIFFLES (OF YOU OR YOUR PEOPLE.) IT IS TIME TO BE PREPARED.

Colloidal Silver is the most potent disinfectant and antiseptic, and on-contact killer of viruses, bacteria, fungi and all kinds of germs. My guess is, if you want to make it, you probably know what it does, and how it has been used for the last 3,000 years. Since you can make it yourself and you need no prescription, you will not see it on TV -- ever!

Items you need:

2 ft. common electric wire (any laying around in the house)

4 small alligator clamps (\$6 for 4 at the hardware store)

3 9 volt batteries (about \$ 10)

Distilled water \$0.99

Saline (eyewash drops) \$2-3.00

1 ft silver wire, 999.99 pure . \$10-25.00, depending on gauge, thin will do fine.

A glass (for the electrolysis) no plastic or metal containers

Instructions in the video. <https://ycpt.org/make-some-colloidal-silver/>

You don't need a box for the apparatus or soldering anything. twist the wires and cover with electric tape. Just connect your batteries in series to get 27 Volt.

When you are done, clean the oxidized wire with a rough cloth or soda, and store all the pieces in a zip-lock bag until next time.

Store colloidal silver in glass, away from light.

51 Researched Benefits Of Silver

1. Silver has shown the ability to wipe out common throat ailments such strep.
2. Ten drops of silver in the ear can aid in wiping out ear infections.
3. Quality colloidal silver soothes and wipes out eye infections (conjunctivitis, stys).
4. Colloidal silver has been shown to treat rhinosinitus in sheep, suggesting it can clear sinus and upper respiratory infections.
5. Silver ions have shown promise in inactivating influenza and maybe show promise for inactivating other viruses.
6. Silver nano-particles have shown success in promoting anti-inflammatory properties.
7. Silver-coated endotracheal tubes have shown promise in prevention of ventilator-associated pneumonia.
8. Placing silver induced products on the urinary tract has shown promise in treating Urinary Tract Infections (UTIs)
9. Over time, antibiotics lose their ability to combat infection. Silver has been shown to boost the immune system to fight infection.
10. Silver nanoparticles have shown promise against hematophagous parasites.
11. Swishing silver in the mouth has been shown to prevent plaque buildup, tooth decay, and bleeding gums.
12. Silver promotes optimal digestion.
13. Digested silver quickly combats food poisoning.
14. Silver has the ability to kill mold (including black mold) and mildew on surfaces throughout the home.
15. Applying silver products on cuts, sores, and boils promotes healing.

16. Applying silver to rashes can aid in soothing itches.
17. Silver has the ability to kill various fungi, including athlete's foot and nail fungi.
18. Silver has been successfully used to kill staph infections, including MRSA.
19. Applying silver to burns, especially sunburns, can soothe and heal.
20. Silver has shown success in inactivating the herpes simplex virus.
21. Silver infused water has been used to support HIV/AIDS intervention.
22. Silver has been shown to kill cancerous cells and has been considered as an alternative treatment to chemotherapy.
23. Silver applied to insect bites provides relief from itches.
24. Silver applied to infected areas can kill ringworms.
25. Silver applied to the vaginal area can combat yeast infections.

Unlock The Key To Total Body Healing With Nature's Most Potent Antimicrobial.
Silver-Healer-800
26. Relief from jock itch can be found through applying silver around the affected area.
27. Silver's antibacterial properties can provide relief from acne breakouts.
28. Applying silver to the scalp can relieve itchy scalp and dandruff.
29. When ingested, silver shows promise in treating laryngitis.
30. Silver's ability to kills single cells organisms allows it to treat eczema when applied to the affected area.
31. Silver shows promise in treating psoriasis.
32. Silver purifies water that has germ contaminants present.
33. Silver is used in many airline filters to prevent water borne diseases.
34. When applied on mayonnaise and dairy products, silver has the ability to prevent salmonella growth.
35. Ketchup, mustard, relish, and other condiments get a prolonged life with the addition of silver.
36. Silver's anti-fungal, anti-bacterial, and anti-viral can help treat Lyme disease.
37. Silver's antiviral properties help combat the common cold.

38. When applied to the scalp, silver can promote hair growth.
39. Sixty-six percent of patients in a trial found that their warts regressed when silver was applied.
40. Silver's anti-microbial properties have shown promise in stopping asthma attacks.
41. When ingested, silver has the ability to combat Whooping cough.
42. Using colloidal silver regularly allowed one woman to treat her Multiple Sclerosis.
43. Can minimize symptoms of Crohn's disease.
44. When ingested silver can heal a pet's stomach ache.
45. Silver can heal pet skin issues such as rashes and ringworm.
46. When pets leave messes on the floor or carpet, silver can get rid of nasty odors.
47. Applying silver to cuts helps treats both human and pet infections.
48. Applying silver on cuts can prevent infections in pets.
49. Silver has the ability to keep pets fungi-free.
50. Colloidal silver can penetrate the large intestine and treat traveler's diarrhea and cholera.
51. Silver has the ability to inhibit both Hepatitis B & C viruses.
